

# **sunsports, inc.**

apparel embellishment & distribution

## **Liability Waiver**

Whether it is screen printing, embroidery, appliqué, or any other embellishment service, Sunsports is committed to providing the highest level of quality and service. Because of our high quality standards and as a matter of company policy, Sunsports uses standardized curing settings for its printing and heat applied services. We do not perform wash tests. **It is recommended and the sole responsibility of its customers does their own testing such as durability, colorfast, ink migration or any other applicable test for *their* product.**

Sunsports will do its initial test to ensure that the product is applied and/or transferred correctly, however, because each customer has their own individual quality and performance standards, and the bonding of heat-transfer and appliqué varies from fabric to fabric, it is the sole responsibility of the customer to test their own goods before a production order is issued to ensure that the particular product meets their requirements. Moreover, each end user of the product will care for it differently, and for this reason Sunsports cannot accept responsibility for the product after it leaves our facility.

Sunsports is committed to providing the highest level of quality and service. Our track record reveals a damage ratio well below .5%. Nevertheless, we require a 2% ratio which is the generally accepted allowance in the garment industry.

We look forward to providing more products, processes, and expanding the way in which we serve you.

Undersigned has read and understood the above liability waiver.
